Table S1. Seed species offered to quenda and woylies, their respective size (mm), mass (g), presence of eliasomes, dormancy and laboratory treatment used to trigger germination.

Seed species	Size (mm)	Mass (g)	Presence of eliasomes	Physical dormancy	Laboratory treatment*
<i>Acacia acuminata</i>	5	0.014	Yes	Yes	Hot water
<i>Dodonaea viscosa</i>	3	0.009	No	Yes	Hot water
<i>Gastrolobium calycinum</i>	5	0.012	No	Yes	Hot water
