

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 54, Issue 5, 2014, 519–644

Editorial iii

PERSPECTIVES ON ANIMAL BIOSCIENCES

Interactions between microbial consortia in biofilms: a paradigm shift in rumen microbial ecology and enteric methane mitigation

R. A. Leng 519–543

RESEARCH PAPERS

Genomic prediction of weight and wool traits in a multi-breed sheep population

N. Moghaddar, A. A. Swan and J. H. J. van der Werf 544–549

Hormonal growth implants affect feed efficiency and expression of residual feed intake-associated genes in beef cattle

W. Al-Husseini, C. Gondro, K. Quinn, L. M. Cafe, R. M. Herd, J. P. Gibson, P. L. Greenwood and Y. Chen 550–556

Comparing AUS-MEAT marbling scores using image analysis traits to estimate genetic parameters for marbling of Japanese Black cattle in Australia

Sakura Maeda, Joe Grose, Keisuke Kato and Keigo Kuchida 557–563

The comparison of two embryo donor breeds for the generation of transgenic goats by DNA pronuclear microinjection

Vicente J. F. Freitas, Irina A. Serova, Lyudmila E. Andreeva, Luciana M. Melo, Dárcio I. A. Teixeira, Alessandra F. Pereira, Raylene R. Moura, Edilson S. Lopes-Jr, Joanna M. G. Souza-Fabjan, Ribrio I. T. P. Batista and Oleg L. Serov 564–568

A diagnostic method for gander selection in Zi geese (*Anser cygnoides* L.) and Rhin geese (*Anser anser* L.) using massage reaction and semen quality

S. J. Liu, J. L. Li and H. Li 569–573

Utilisation of Large White × Mong Cai crossbred sows and Duroc and stress negative Piétrain boars for the production of fattening pigs under household conditions in northern Vietnam

D. D. Luc, A. Clinquart, V. D. Ton, D. V. Binh, P. Leroy and F. Farnir 574–581

Repeatability and frequency of in-paddock sheep walk-over weights: implications for flock-based management

D. J. Brown, D. B. Savage and G. N. Hinch 582–586

The influence of stocking rate and mixed grazing of Angora goats and Merino sheep on animal and pasture production in southern Australia. 4. Gastrointestinal parasitism

B. A. McGregor, P. J. A. Presidente and N. J. Campbell 587–597

Nutritive value, *in vitro* fermentation and methane production of perennial pastures as affected by botanical composition over a growing season in the south of Chile

J. P. Keim, I. F. López and R. Berthiaume 598–607

Lysine requirement of 1.5–5.5 kg pigs fed liquid diets

J. H. Eiseemann, H. E. Lewis, A. I. Broome, K. Sullivan, R. D. Boyd, J. Odle and R. J. Harrell 608–615

Effects of dietary probiotics on growth performance, faecal microbiota and serum profiles in weaned piglets

Xiaoli Dong, Naifeng Zhang, Meng Zhou, Yan Tu, Kaidong Deng and Qiyu Diao 616–621

The carcass quality, meat quality and sensory characteristics of broilers raised on diets containing either *Musca domestica* larvae meal, fish meal or soya bean meal as the main protein source

E. Pieterse, Q. Pretorius, L. C. Hoffman and D. W. Drew 622–628

The impact of best practice health and husbandry interventions on smallholder cattle productivity in southern Cambodia

J. R. Young, L. Rast, S. Suon, R. D. Bush, L. A. Henry and P. A. Windsor 629–637

Effects of type, sex and age on goat skin and leather characteristics

M. Salehi, I. Kadim, O. Mahgoub, Sh. Negahdari and R. S. Eshraghi Naeeni 638–644
