

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 55, Issue 9, 2015, 1081–1214

The role and potential advantages of vitamin D metabolites in maintaining calcium status in high-producing dairy herds

J. J. McGrath, D. B. Savage and I. R. Godwin 1081–1089

Native Australian shrub legume species may provide an alternative feed source for livestock

P. A. O'Keefe, D. J. Orchard, B. A. Orchard, J. W. Piltz and E. H. Clayton 1090–1096

Modelling the potential of birdsfoot trefoil (*Lotus corniculatus*) to reduce methane emissions and increase production on wool and prime lamb farm enterprises

Natalie Doran-Browne, Ralph Behrendt, Ross Kingwell and Richard Eckard 1097–1105

Effect of climate variability on pasture-based dairy feeding systems in south-east Australia

Seyda Özkan, Julian Hill and Brendan Cullen 1106–1116

Associative effects of poor-quality forages combined with food industry byproducts determined *in vitro* with an automated gas-production system

Franco Tagliapietra, Mirko Cattani, Matteo Guadagnin, Mohamed L. Haddi, Leonardo Sulas, Rosella Muresu, Andrea Squartini, Stefano Schiavon and Lucia Bailoni 1117–1122

Effect of calcium salt of fatty acids supplementation on performance of Malpura lambs

R. S. Bhatt, A. Sahoo, A. K. Shinde and S. A. Karim 1123–1130

Strategic early treatment for control of sheep flystrike: potential economic benefits examined using a weather-driven model of flystrike risk

Brian J. Horton 1131–1144

Dietary phosphate equivalence of four forms of Pi contrasted with a novel microbial phytase from *Citrobacter braakii* in broiler chickens

A. J. Cowieson, F. Fru-Nji and O. Adeola 1145–1151

Determination and prediction of the net energy content of seven feed ingredients fed to growing pigs based on chemical composition

D. W. Liu, L. Liu, D. F. Li and F. L. Wang 1152–1163

SNP included in candidate genes involved in muscle, lipid and energy metabolism behave like neutral markers

Natalia Sevane, Javier Cañon, John L. Williams, Hubert Levéziel, Alessio Valentini, Susana Dunner and the GemQual Consortium 1164–1171

Transcriptome profiling of muscle by RNA-Seq reveals significant differences in digital gene expression profiling between Angus and Luxi cattle

G. F. Liu, H. J. Cheng, W. You, E. L. Song, X. M. Liu and F. C. Wan 1172–1178

Body condition score is a critical factor determining the onset of puberty in Blanca Andaluza female goat kids

L. Gallego-Calvo, M. C. Gatica, I. Celi, J. L. Guzmán and L. A. Zarazaga 1179–1183

Viability analyses of an endangered donkey breed: the case of the Asinina de Miranda (*Equus asinus*)

M. Quaresma, A. M. F. Martins, J. B. Rodrigues, J. Colaço and R. Payan-Carreira 1184–1191

Quality and sensory characteristics of Culatello dry-cured products obtained from the Italian autochthonous pig Suino Nero Lucano and from a modern crossbred pig

Annamaria Perna, Amalia Simonetti, Immacolata Intaglietta and Emilio Gambacorta 1192–1199

Effect of sex and slaughter weight on meat and fat quality of the Krškopolje pig reared in an enriched environment

M. Zemva, T. M. Ngapo, S. Malovrh, A. Levart and M. Kovac 1200–1206

Effect of high temperatures on breeding rabbit behaviour

Antoni Dalmau, Bernardo Catanese, Oriol Rafel, Pedro Rodriguez, Carmen Fuentes, Pol Llonch, Eva Mainau, Antonio Velarde, Josep Ramón, Ester Taberner, Manel López-Béjar and Miriam Piles 1207–1214
