

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 59, Issue 1, 2019, 1–200

Editorial

Science: on the shoulders of those who came before us

W. L. Bryden i–ii

Reflections

Standing on giant shoulders: a personal recollection of the lives and achievements of eminent animal scientists 1965–2015

Alan Bell 1–34

Genetics and Genomics

Weaner survival is heritable in Australian Merinos and current breeding objectives are potentially leading to a decline in survival

S. F. Walkom, A. N. Thompson, E. Bowen and D. J. Brown 35–47

Effect of quality control, density and allele frequency of markers on the accuracy of genomic prediction for complex traits in Nellore cattle

Tiago Bresolin, Guilherme Jordão de Magalhães Rosa, Bruno Dourado Valente, Rafael Espigolan, Daniel Gustavo Mansan Gordo, Camila Urbano Braz, Gerardo Alves Fernandes Júnior, Ana Fabricia Braga Magalhães, Diogo Anastacio Garcia, Gabriela Bonfá Frezarim, Guilherme Fonseca Carneiro Leão, Roberto Carvalheiro, Fernando Baldi, Henrique Nunes de Oliveira and Lucia Galvão de Albuquerque 48–54

Nutrition and Metabolism

Aspects of digestive function in sheep related to phenotypic variation in methane emissions

J. J. Bond, M. Cameron, A. J. Donaldson, K. L. Austin, S. Harden, D. L. Robinson and V. H. Oddy 55–65

Sheep and goat browsing a tropical deciduous forest during the rainy season: why does similar plant species consumption result in different nutrient intake?

J. Ventura-Cordero, P. G. González-Pech, J. F. J. Torres-Acosta, C. A. Sandoval-Castro and J. Tun-Garrido 66–72

Feed Quality, Nutritional Value and Toxicology

Influence of feed ingredients with pellet-binding properties on physical pellet quality, growth performance, carcass characteristics and nutrient retention in broiler chickens

Arash Moradi, Soudabeh Moradi and M. Reza Abdollahi 73–81

Effect of pelleted total mixed rations with different levels of intact rapeseed on performance, carcass traits, serum biochemical indices and meat quality of Boer goats

Fang Chen, Jin-tao Wei, Xue-hai Yang, Na Zhao, Wei Zhang, Shao-wen Huang, Nian-dong Yan and Wan-zheng Guo 82–88

Comparative effects of powder, aqueous and methanolic extracts of purslane (*Portulaca oleracea* L.) on growth performance, antioxidant status, abdominal fat deposition and plasma lipids in broiler chickens

Mahmood Habibian, Ghorbanali Sadeghi and Ahmad Karimi 89–100

The effect of a probiotic preparation containing *Enterococcus faecium* DSM 7134 for chickens on growth performance, immune status, and the histology and microbiological profile of the jejunum

Katarzyna Ognik, Ewelina Cholewińska, Magdalena Krauze, Katarzyna Abramowicz and Paulius Matusevicius 101–108

Dietary supplementation with glucogenic precursors and fatty acids improves performance and health of periparturient dairy cows

R. Klebaniuk, G. Kochman, E. Kowalczyk-Vasilev, E. R. Grela, D. Kowalczyk-Pecka and M. Bąkowski 109–121

Continued on next page

Behaviour, Well-being and Health

Application of accelerometers to record drinking behaviour of beef cattle

*Lauren R. Williams, Greg J. Bishop-Hurley, Angela E. Anderson
and Dave L. Swain* 122–132

Histomorphometric analysis of the small intestine of broiler chick embryos injected
in ovo with methionine

*Mohammad Naser Nazem, Sayed Mohsen Sajjadian, Reza Kheirandish
and Hamideh Mohammadrezaei* 133–139

Adding a bio-response modifier and zinc oxide to piglet weaner diets influences immunological
responses to weaning

*Ujjwal Kumar De, Reena Mukherjee, Chandan Prakash, Bhimnere Hanumanthagouda Manjunatha Patel,
Sukdeb Nandi, Umesh Dimri, Ashok Kumar Verma and Med Ram Verma* 140–147

Environment, Production Systems and Management

Growth of Brahman cross heifers to 2 years of age in the dry tropics

Geoffry Fordyce and Kerri Chandra 148–159

Simultaneous measurements of ammonia volatilisation and deposition at a beef feedlot

M. R. Redding, R. Lewis and P. R. Shorten 160–168

Quantification of methane emissions from Murrah buffaloes fed different energy diets during
various temperature humidity index periods in a tropical environment

Papori Talukdar, Shivlal Singh Kundu and Goutam Mondal 169–176

Production Systems in Transition

Antimicrobial drug usage and poultry production: case study in Ghana

Sherry Johnson, Kwasi Bugyei, Priscillia Nortey and William Tasiame 177–182

Meat Science and Product Quality

Effects of immunocastration on the performance and meat quality traits of feedlot-finished

Bos indicus (Nellore) cattle

*J. F. M. Gómez, A. Saran Netto, D. S. Antonelo, J. Silva, G. A. Sene, H. B. Silva,
N. P. Dias, P. R. Leme and S. L. Silva* 183–190

Physicochemical and sensory characteristics of dry-cured loin made from pigs fed *Allium hookeri*
added whey powder and sensory trait evaluation using electronic tongue

Ji-Han Kim, Jung-Ho Kim, Hyun-Joo Jang, Hyun-Jin Lee and Chi-Ho Lee 191–200
