Volume 71 Number 9 2018

CONTENTS

Foreword

Sir Derek Harold Richard Barton: The Australian Legacy

J. A. Smith **625**

Highlight

Recent Advances in Steroid Synthesis: A Tribute to Sir Derek Barton

K. D. Jones, S. G. Stewart **627**

Review

Recent Advances in Photodecarboxylations Involving Phthalimides

S. Mumtaz, M. J. Robertson, M. Oelgemöller **634**

Full Papers

Biomimetic Synthesis of Hyperjapones F-I

H. C. Lam, Q. D. Phan, C. J. Sumby, J. H. George **649**

Chemoenzymatic Syntheses of Some Analogues of the Tricarbocyclic Core of the Anti-Bacterial Agent Platencin and the Biological Evaluation of Certain of their *N*-Arylpropionamide Derivatives

R. N. Muhammad, E. L. Chang, A. G. Draffan, A. C. Willis, P. D. Carr, M. G. Banwell **655**

Brønsted Acid-Catalysed Allylic Amination of 1-(2-Aminoaryl)prop-2-en-1-ols to 1,2-Dihydroquinolines

D. P. Day, S. A. Henry, Y. Zhao, J. Jin, G. J. Clarkson, P. W. H. Chan **673**

Gold- and Silver-Catalysed Cyclisation Reactions of β -Amino Allenes

L. M. Joyce, A. C. Willis, C. J. T. Hyland, S. G. Pyne **682**

Competitive 1,3-Dipolar Cycloaddition Reactions of an Azomethine Ylide with Aromatic and Carbonyl Groups of Nitro-Substituted Isatoic Anhydrides

A. M. D'Souza, D. J. Rivinoja, R. J. Mulder, J. M. White, A. G. Meyer, C. J. T. Hyland, J. H. Ryan **690**

Are Aminomethyl Thioesters Viable Intermediates in Native Chemical Ligation Type Amide Bond Forming Reactions?

C. L. Charron, J. M. Cottam Jones, C. A. Hutton **697**

Siliquapyranone: A Tannic Acid Tetrahydropyran-2-one Isolated from the Leaves of Carob (*Ceratonia siliqua*) by Pressurised Hot Water Extraction

B. J. Deans, B. E. Skierka, B. W. Karagiannakis, D. Vuong, E. Lacey, J. A. Smith, A. C. Bissember **702**

Alkyne-Substituted Fimbrolide Analogues as Novel Bacterial Quorum-Sensing Inhibitors

N. N. Biswas, G. M. Iskander, M. Mielczarek, T. T. Yu, D. StC. Black, N. Kumar **708**

Communication

Thioamide Derivative of the Potent Antitubercular 2-(Decylsulfonyl)acetamide is Less Active Against *Mycobacterium tuberculosis*, but a More Potent Antistaphylococcal Agent

H.-K. Sun, A. Pang, D. C. Farr, T. Mosaib, W. J. Britton, S. Anoopkumar-Dukie, I. D. Grice, M. J. Kiefel, N. P. West, G. D. Grant, T. A. Houston **716**
