Exploration Geophysics

www.publish.csiro.au/journals/eg

Exploration Geophysics publishes excellent research in geophysics, reviews, technical papers and significant case histories in minerals, petroleum, mining and environmental geophysics, and is an official publication of the Australian Society for Exploration Geophysics. Authors and readers are professional earth scientists specialising in the practical application of the principles of physics and mathematics to solve problems in a broad range of geological situations. They are variously in industry, government and academic research institutions. All papers are peer reviewed.

Instructions for Applicants

- Determine your membership level, see website for details.
- Applicants for Active membership must nominate three ASEG members to act as referees. An active SEG member does not need referees.
- Applicants for Student membership must obtain the signature of their university supervisor.
- Submit your application to the address above and attach one year's dues. If payment is to be made by credit card, the application may be sent by fax.
