

Exploration Geophysics

Contents Volume 49 Issue 2 2018

Noise removal for airborne time domain electromagnetic data based on minimum noise fraction

Yue Li, Yang Meng, Yiming Lu, Lingqun Wang, Bin Xie, Yuqi Cheng and Kaiguang Zhu 127–133

Trans-dimensional Bayesian inversion of airborne electromagnetic data for 2D conductivity profiles

Rhys Hawkins, Ross C. Brodie and Malcolm Sambridge 134–147

Investigating subsurface structures of Gachsaran oil field in Iran using 2D inversion of magnetotelluric data

Mohamadhasan Mohamadian Sarvandani, Ali Nejati Kalateh, Reza Ghaedrahmati and Abbas Majidi 148–162

MOPSO: a new computing algorithm for joint inversion of Rayleigh wave dispersion curve and refraction traveltimes

Rashed Poormirzaee 163–175

Comparative analyses of seismic site conditions and microzonation of the major cities in Gangwon Province, Korea

Abid Ali and Ki Young Kim 176–186

An implicit spatial and high-order temporal finite difference scheme for 2D acoustic modelling

Enjiang Wang and Yang Liu 187–201

Modified interferometric imaging condition for reverse-time migration

Xue-Bao Guo, Hong Liu and Ying Shi 202–212

Adaptive phase k-means algorithm for waveform classification

Chengyun Song, Zhining Liu, Yaojun Wang, Feng Xu, Xingming Li and Guangmin Hu 213–219

Subsurface attenuation estimation using a novel hybrid method based on FWE function and power spectrum

Jingnan Li, Shangxu Wang, Dengfeng Yang, Genyang Tang and Yangkang Chen 220–230

Investigation of the line arrangement of 2D resistivity surveys for 3D inversion

Keisuke Inoue, Hiroomi Nakazato, Mutsuo Takeuchi, Yoshihiro Sugimoto, Hee Joon Kim, Hiroshi Yoshisako, Michiaki Konno and Daisuke Shoda 231–241
