## Contents      Volume 49      Issue 5      2018

Synthetic modelling and analysis of CSEM full-field apparent resistivity response combining EM induction and IP effect for 1D medium

*Weiqiang Liu, Pinrong Lin, Qingtian Lü, Yong Li and Jianhua Li* 609–621

The magnetotelluric tensor: improved invariants for its decomposition, especially ‘the 7th’

*Frederick E. M. Lilley* 622–636

The relationship between normalised horizontal-to-vertical spectral ratios (HVSRS) of microtremors and the  $F$  distribution

*Ikuo Cho and Takaki Iwata* 637–646

A simple inversion algorithm to estimate a linearly increasing velocity model for microseismic monitoring

*Woochang Choi, Wonsik Kim and Sukjoon Pyun* 647–654

Seismic facies-controlled prestack simultaneous inversion of elastic and petrophysical parameters for favourable reservoir prediction

*Sheng Zhang, Handong Huang, Baoheng Zhu, Huijie Li and Lihua Zhang* 655–668

Velocity analysis of CMP gathers acquired by an array GPR system ‘Yakumo’: results from field application to tsunami deposits

*Honghua Wang, Hai Liu, Jie Cui, Xiangyun Hu and Motoyuki Sato* 669–674

The Marine Vibrator Joint Industry Project: four years on

*Andrew Feltham, Marc Girard, Mike Jenkerson, Vladimir Nechayuk, Shari Griswold, Nick Henderson and Graham Johnson* 675–687

Estimation of reservoir properties from seismic data through a Markov Chain Monte Carlo-AVA inversion algorithm

*Mattia Aleardi, Fabio Ciabbarri and Alfredo Mazzotti* 688–703

Channel edge detection using 2D complex shearlet transform: a case study from the South Caspian Sea

*Haleh Karbalaali, Abdolrahim Javaherian, Stephan Dahlke and Siyavash Torabi* 704–712

Compensation for aircraft effects of magnetic gradient tensor measurements in a towed bird

*Chunxiao Xiu, Xiaohong Meng, Lianghui Guo, Sheng Zhang and Xingdong Zhang* 713–725

Correction and compensation of an airborne fluxgate magnetic tensor gradiometer

*Yangyi Sui, Hongsong Miao, Zhijian Zhou, Hui Luan and Yanzhang Wang* 726–734

Quantifying the differences between gravity reduction techniques

*Philip Heath* 735–743

Estimation of elastic anisotropy from three-component ultrasonic measurements using laser Doppler interferometry

*Andrej Bóna, Maxim Lebedev, Roman Pevzner, Boris Gurevich and Mahyar Madadi* 744–750

*Continued on next page*

The archaeological site of Sagalassos (Turkey): exploring the mysteries of the invisible layers using geophysical methods

*Lara De Giorgi and Giovanni Leucci* 751–761

Improving bitumen detection in resistivity surveys by using induced polarisation data

*Seyyed Reza Mashhadi, Kamran Mostafaei and Hamidreza Ramazi* 762–774

Sensitivity of shale anisotropic parameters to core cutting rotation error

*Shiguang Guo, Sumit Verma, Qing Wang, Fei Pang, Kui Zhang, Haifu Sun and Xiansheng Zhang* 775–781

A constrained spectral inversion method based on compressive sensing in order to distinguish high-quality shale

*Hua Zhang, Zhenhua He, Yalin Li, Rui Li and Guangming He* 782–791
