**Contents**    Volume 49    Issue 6    2018

Least-squares Kirchhoff migration with non-smooth regularisation strategy for subsurface imaging  
*Jie Hou and Yanfei Wang* 793–802

Amplification characteristics at Iedang Reservoir dam sites determined using H/V spectral ratio with background noise, S-wave and coda wave energy  
*Jun Kyoung Kim, Soung Hoon Wee, Seong Hwa Yoo and Kwang Hee Kim* 803–811

Geophysical strata rating (GSR) as an aid in carbonate reservoir characterisation: an example from the South Pars gas field, Persian Gulf Basin  
*Mohammad Ali Faraji, Ali Kadkhodaie, Hossain Rahimpour-Bonab and Peter Hatherly* 812–824

Comparison of the projection onto convex sets and iterative hard thresholding methods for seismic data interpolation and denoising  
*Benfeng Wang and Chenglong Gu* 825–832

Sensitivity evaluation of a seismic interpolation algorithm  
*Doan Huy Hien, Seonghuyng Jang, Ta Quang Minh, Bui Viet Dung and Nguyen Thanh Tung* 833–843

A high expansion implicit finite-element prestack reverse time migration method  
*Limin Liu, Yun Wang, Yong Wang, Jing Chen and Yanqiu Liu* 844–855

Poynting vector-guided imaging condition for imaging fractures using microseismic data  
*Yeonghwa Jo, Soon Jee Seol, Hyungwook Choi and Joongmoo Byun* 856–867

Analysis of reservoir heterogeneities and depositional environments: a new method  
*Cyril D. Boateng and Li-Yun Fu* 868–880

Development and numerical tests of a Bayesian approach to inferring shallow velocity structures using microtremor arrays  
*Ikuo Cho and Takaki Iwata* 881–890

Acoustic VTI reverse time migration based on an improved source wavefield storage strategy  
*Ying Shi, Xiuzheng Fang, Weihong Wang and Xuan Ke* 891–897

A new staggered grid finite difference scheme optimised in the space domain for the first order acoustic wave equation  
*Wenquan Liang, Xiu Wu, Yanfei Wang, Jingjie Cao, Chaofan Wu and Baoqing He* 898–905

Reconstruction of 3D non-uniformly sampled seismic data along two spatial coordinates using non-equispaced curvelet transform  
*Hua Zhang, Su Diao, Haiyang Yang, Guangnan Huang, Xiao Chen and Lei Li* 906–921

Simple assessment of shallow velocity structures with small-scale microtremor arrays: interval-averaged S-wave velocities  
*Ikuo Cho, Atsushi Urabe, Tsutomu Nakazawa, Yoshiki Sato and Kentaro Sakata* 922–927

*Continued on next page*

Integration of 3D reflection seismics and magnetic data for deep platinum mine planning and risk mitigation: a case study from Bushveld Complex, South Africa  
*Stephanie E. Scheiber-Enslin and Musa Manzi* 928–939

Two dimensional cross-gradient joint inversion of gravity and magnetic data sets constrained by airborne electromagnetic resistivity in the Capricorn Orogen, Western Australia  
*Adrián Misael León-Sánchez, Luis A. Gallardo and Alan Yusef Ley-Cooper* 940–951

Multiple-point geostatistical simulation for mine evaluation with aeromagnetic data  
*Jinpyo Hong, Seokhoon Oh and Seong-Jun Cho* 952–965
