

## Peer reviewers 2012

Articles submitted to *Healthcare Infection* are subject to a blinded peer review. This process involves an initial two or three reviewers per article in addition to further reviews of revised manuscripts. The process is an essential component in ensuring the publication of high quality articles. As submissions to *Healthcare Infection* increase, so does the workload of peer reviewers and the quality of accepted articles.

On behalf of the readers of *Healthcare Infection*, I would like to take this opportunity to express my thanks to those persons who have undertaken a peer review during 2012 to date. I trust that you have found this experience rewarding and welcome your continued support.

At the time of writing, during 2012, the following people have or are currently undertaking a review: Adrianopoulos, Nick; Astagneau, Pascal; Baird, Rob; Beckingham, Wendy; Bellaard-Smith, Elizabeth; Boardman, Claire; Bradford,

Jennifer; Borg, Michael; Brumpton, Robyn; Carling, Philip; Cheng, Allen; Chinniah, Terrence; Collignon, Peter; Cooley, Louise; Dendle, Claire; Donnellan, Robyn; Ferguson, John; Foster, Lynelle; Gardner, Anne; Geary, Alanna; Gordon, David; Grayson, M.
