

Editor's Comments

Welcome to 1996 and a New Year of exciting and interesting Infection Control Challenges.

To ICA NSW Inc Happy 20th Birthday and good luck with the ACIA National Conference in May.

Readers

Have you thought about spending a

few days in Sydney to attend the National Conference, catch up with old friends and explore the beautiful Sydney Harbour and historic Rocks area.

The journal has made it into its second year, the first year was one of learning and of course a few teething problems. There will be 5 issues of the journal this year to compensate or complement the 3 issues of 1995.

Please keep the articles rolling in. Bear with us, the response time is sometimes slow but we are reviewing all the articles submitted. Urgent call for photos to brighten up the Journals exciting page, to help us put faces to the many names we see in print and to show us just what did happen at the State conferences and events.
