

## Corrigendum

Volume 37, Number 3

Mercury and Selenium Concentrations in Sharks from Northern Australian Waters.

*J. M. Lyle*

p. 315. In Table 4, relationships between total length ( $t$ ) and fork length ( $l$ ) are given in the form

$$t = al - b,$$

where  $a$  and  $b$  are constants. The relationship should be:

$$t = al + b.$$

The error was not transferred to any of the calculations based on these relationships.
