

PACIFIC CONSERVATION BIOLOGY

Volume 16

Number 4

Contents

EDITORIAL

- The case for an "Excellence in Scholarship for Australia" initiative. *Mike Calver.* 228

FORUM ESSAY

- Introduced species in New Zealand — Their impacts on a biodiversity hotspot
Mark N. H. Seabrook-Davison, Dianne H. Brunton. 230
- Erratum notice 236

RESEARCH PAPERS

- Notes on the size structure of a population of the Jacky Dragon *Amphibolurus muricatus* in a small fragmented urban remnant. *Dennis Hitchen, Shelley Burgin and Danny Wotherspoon.* 237
- Effectiveness of the *Liberator*™ in reducing predation on wildlife by domestic cats
M. C. Calver and S. R. Thomas. 244
- The impacts of Sambar *Cervus unicolor* on the threatened Shiny Nematolepis *Nematolepis wilsonii*. *Ami Bennett and Graeme Coulson.* 251
- Recreational SCUBA diver interactions with the critically endangered Grey Nurse Shark *Carcharias taurus*. *Sean M. Barker, Victor M. Peddemors and Jane E. Williamson.* 261
- Discovery of a green frog *Litoria aurea* with five webbed feet — amphibian deformities and consequences for the conservation of native and introduced frogs.
Mark N. H. Seabrook-Davison, Jamie Seabrook-Davison and Dianne H. Brunton. 270
- Assessing rainforest restoration: the value of buffer strips for the recovery of rainforest remnants in Australia's Wet Tropics. *Laura J. Sonter, Daniel J. Metcalfe and Margaret M. Mayfield.* 274

BOOK REVIEWS

- Terrestrial Vertebrate Fauna Assessments for Ecological Impact Assessment. *A. J. Lappin, C. M. Scammell, L. M. Carr and C. E. Meathrel.* 289
- At the End of the River The Coorong and Lower Lakes. *R. L. Croome.* 290
- Contested Country: Local and Regional Natural Resources Management in Australia.
Lai Ming (Christie). 291
- Index 293

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations. Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers (provided they are subscribers at the time of submitting their manuscript) receive a free pdf and do not pay page charges, non-subscribers do not receive pdf files and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges but they will pay a nominal charge for their pdf file if required. This is similar to procedures followed by other journals, including the Australian Ecological Society and the Royal Society of Western Australia in the publication of their journals. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy. For your convenience subscription forms have been enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague and/or library to subscribe.
