

# PACIFIC CONSERVATION BIOLOGY

Volume 17

Number 1

## Contents

### EDITORIAL

Broad-Spectrum-Academics' Forum Essays. <i>Graham R. Fulton.</i>	3
Obituary, Lionel Wayne Braithwaite, Ph.D.	4

### FORUM ESSAY

How can we ensure that conservation policies are based on science, not emotion? <i>Rick Shine.</i>	6
---	---

### RESEARCH PAPERS

A preliminary survey for avian pathogens in Columbiform birds on Socorro Island, Mexico. <i>Saturnino Yanga, Juan E. Martínez-Gómez, Ravinder N. M. Sehgal, Patricia Escalante, Frank Carlos Camacho and Douglas A. Bell.</i>	11
The effect of woody plant diversity and other stand and landscape factors on the diversity and abundance of birds using farm shelterbelts. <i>R. S. Bonifacio, C. M. Kinross, G. M. Gurr and H. Nicol.</i>	22
Early responses of bats to alternative silvicultural treatments in wet eucalypt forests of Tasmania. <i>Bradley S. Law and Peter R. Law.</i>	36
The development of urchin barrens in seagrass meadows at Luscombe Bay, Western Australia from 1985 to 2004. <i>Mark W. Langdon, Eric I. Paling and Mike van Keulen.</i>	48
Potential lantana invasion of the Greater Blue Mountains World Heritage Area under climate change. <i>Alexander Gold, Daniel Ramp and Shawn W. Laffan.</i>	54
Spatial distribution and habitat preferences of co-occurring vertebrate species: Case study of an endangered frog and an introduced toad in Fiji. <i>Nunia Thomas, Clare Morrison, Linton Winder and Craig Morley.</i>	68

### BOOK REVIEWS

Adaptive Environmental Management: A Practitioner's Guide. <i>Mike Calver.</i>	78
Amphibian Biology, Volume 8. <i>Frank Lemckert.</i>	78
Dry Times Blueprint for a Red Land. <i>Bea Sommer.</i>	80
Forest Pattern and Ecological Process: A Synthesis of 24 Years of Research. <i>Harry F. Recher.</i>	81
Sharks and Rays of Australia. <i>Harry F. Recher.</i>	21

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

### COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations. Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers (provided they are subscribers at the time of submitting their manuscript) receive a free pdf and do not pay page charges, non-subscribers do not receive pdf files and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges but they will pay a nominal charge for their pdf file if required. This is similar to procedures followed by other journals, including the Australian Ecological Society and the Royal Society of Western Australia in the publication of their journals. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy. For your convenience subscription forms have been enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague and/or library to subscribe.

# TO BE RELEASED SOON

Amphibian Biology Volume 9 Part 2 and Volume 10. Both these volumes will be released in coming months. Orders will be received now for prompt dispatch following publication.

**Volume 9 Part 2** — assesses the decline of amphibians in Brazil, Uruguay and Ecuador. Chapters include: Decline of Amphibians in Brazil; Threats to Uruguayan Amphibians; and Biodiversity and Conservation of Amphibians in Ecuador.

A4, ISBN 9780980311365,  
Aud\$50.00 plus postage

(Part 1 still available as are all volumes in the series and includes status in Paraguay, Chile and Argentina)

Volume 9 will assess the status of Amphibian decline and extinction in the Western Hemisphere in a number of parts yet to be determined and volume 11 will deal with the Eastern Hemisphere. Both these volumes will provide an historical baseline against which future changes can be related. A useful time capsule.

## Volume 10

Is Conservation and Decline of Amphibians: Ecological Aspects, Effects of Humans and Management. Internationally renowned authors bring vitality to their subjects in 15 chapters.

452 pp, A4, illustrated in colour where required for clarity, ISBN 9780980311372,  
Aud\$137.50 plus postage
