

# PACIFIC CONSERVATION BIOLOGY

Volume 20

Number 1

## Contents

### EDITORIAL

- Paying the reviewer debt. *Mike Calver* 2

### FORUM ESSAY

- Compromising for conservation: a protocol for developing sustainable conservation plans in biologically rich and monetarily impoverished communities. *Mochamad Indrawan, Stephen T. Garnett, Yunus Masala and Roland Wirth.* 3

### NEWS AND VIEWS

- Twenty years of seagrass networking and advancing seagrass science: The International Seagrass Biology Workshop Series. *Rob Coles, Fred Short, Miguel Fortes and John Kuo.* 8

- How to write a paper for successful publication in an international peer-reviewed journal. *Gunther Tress, Bärbel Tress and Denis A. Saunders.* 17

### RESEARCH PAPERS

- Reptile Euthanasia — No Easy Solution? *Dr Kristin Warren.* 25

- Euthanizing wildlife: experiences and coping strategies among people who conduct euthanasia. *Erich von Dietze and Dianne Gardner.* 28

- No evidence for Galapagos *Plasmodium* lineage arriving via Humboldt Current seabirds. *Iris I. Levin, Michael J. Adkesson, Maranda Evans, Cindee K. Rettke and Patricia G. Parker.* 37

- Hybridization between the Mallard and native dabbling ducks: causes, consequences and management. *P.-J. Guay, A. Tayson, R. Robinson and J. P. Tracey.* 41

- "Hunting porcupines": citizen scientists contribute new knowledge about rare coral reef species. *Andrew Chin.* 48

- How much land is needed for feral pig hunting in Hawai'i? *Steven C. Hess and James D. Jacobi.* 54

- Guidelines for ecological burning regimes in Mediterranean ecosystems: a case study in *Banksia* woodlands in Western Australia. *Barbara A. Wilson, Janine Kuehs, Leonie E. Valentine, Tracy Sonneman and Kristen M. Wolfe.* 57

- Indicators of coral reef ecosystem recovery following reduction in logging and implementation of community-based management schemes in the Solomon Islands. *S. Albert, A. Grinham, B. Gibbes, I. Tibbetts and J. Udy.* 75

- Major histocompatibility I gene diversity in the critically endangered Laysan duck (*Anas laysanensis*). *Philip Lavretsky, Andrew Engilis, Jr. and Jeffrey L. Peters.* 86

- Preliminary re-survey of the land snail fauna of Rotuma: conservation and biosecurity implications. *Gilianne Brodie, Gary M. Barker, Froseann Stevens and Monifa Fiú.* 94

- Are wild rodents attracted to lure laboratory rats? *A. C. Gsell, M. N. H. Seabrook-Davison, and D. H. Brunton.* 108

- Collation and review of sightings and distribution of three coastal dolphin species in waters of the Northern Territory, Australia. *Carol Palmer, Guido J. Parra, Tracey Rogers and John Woinarski.* 116

### BOOK REVIEWS

- Discovery of Australia's Fishes: A History of Australian Ichthyology to 1930. *Graham R. Fulton.* 126

- Queensland's Threatened Animals. *Eridani Mulder.* 127

- The Housing Bomb, Why our addiction to houses is destroying the environment and threatening our society. *Martin Brueckner.* 128

- Science Under Siege: zoology under threat. *Graham R. Fulton.* 130

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

### COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations. Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in Pacific Conservation Biology should be subscribers to the journal. The Editor-in-Chief will ask whether any of the authors is a subscriber when confirming acceptance of a paper. If one or more authors is a subscriber, there will be no charge for publication, unless the authors have agreed to pay the charges for colour or accelerated publication (see below). If no author subscribes, the corresponding author will be invoiced a nominal Aud\$20 per page including a PDF of the published article and charges for colour or accelerated publication (see below). Whether or not one or more authors subscribes has no bearing on the acceptance of a paper. Authors may choose to include colour figures in their papers at a cost of Aud\$150 per page with a colour component. Authors may also accelerate publication to the next available issue without penalty to other authors by paying full page charges of Aud\$65 per page.

For your convenience subscription forms are enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific region by encouraging a colleague and/or library to subscribe.

ON FRONT COVER: Photo by Leigh Sage. Burning undertaken by Department of Environment and Conservation for research on Recharge and Fire in native banksia woodland on Gnangara mound by CSIRO and DEC under WA State Government's Gnangara Sustainability Strategy.
