Volume 7

Number 4

ISSN 1038-2097

Contents

EDITORIAL	
Conservation Biology in the Pacific. <i>H. F. Recher.</i>	221
FORUM ESSAY	
Are economic instruments the saviour for biodiversity on private land? <i>P. Gibbons, S. V. Briggs and J. M. Shields.</i>	223
RESEARCH PAPERS	
The canopy, bark, soil and litter invertebrate fauna of the Darling Plateau and adjacent woodland near Perth, Western Australia, with reference to the diversity of forest and woodland invertebrates. <i>J. D. Majer, H. F. Recher, B. E. Heterick and A. C. Postle.</i>	229
Conservation of vertebrate fauna using hollows in forests of south-west Western Australia: strategic risk assessment in relation to ecology, policy, planning, and operations management. <i>I. Abbott and K. Whitford.</i>	240
Understanding the impacts of recreation in Australian protected areas: Quantifying damage caused by horse riding in D'Entrecasteaux National Park, Western Australia. <i>N. Phillips and D. Newsome.</i>	256
How grassland plants are distributed over five human-created habitats typical of eucalypt woodlands in a variegated landscape. <i>S. McIntyre, K. M. Heard and T. G. Martin.</i>	274
RESEARCH NOTE	
Bryophytes and the morphospecies concept: a comparison of novice and expert sorting. <i>E. J. Pharo.</i>	290
BOOK REVIEWS	
More than a tourism primer. <i>M. Calver.</i>	292
Index	293

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations.

Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* are encouraged to subscribe to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers receive 25 free reprints and do not pay page charges, non-subscribers do not receive free reprints and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy.

If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague and/or library to subscribe.

ON FRONT COVER: General views of the three main habitats where invertebrates were sampled.
