

Australian Journal of Physics

Volume 32

Melbourne 1979

BINDER — FIX TO FIRST PAGE

Australian Journal of Physics

A medium for the publication of results of original scientific research in pure and applied physics.

Compilations of astrophysical data are published at irregular intervals in Astrophysical Supplements to the Journal.

Board of Standards

The Board of Standards for this Journal is appointed by the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science and consists of:

L. T. Evans (Chairman)
E. F. Annison
A. R. H. Cole
R. W. Crompton
B. V. Hamon
M. D. Hatch
G. A. Horridge
J. P. Quirk
B. J. Robinson
D. E. Tribe
C. H. Tyndale-Biscoe
A. B. Wardrop
B. J. Walby (Editor-in-Chief)

Advisory Committee

Acceptance of papers for this Journal is in the hands of an Advisory Committee consisting of a Chairman appointed by the Executive of CSIRO and the Council of the Australian Academy of Science, and members appointed by the Board of Standards in consultation with the Australian Institute of Physics.

R. W. Crompton (Chairman) (AIP)
W. S. Boundy
B. Y. Mills
J. H. Piddington
T. F. Smith
B. M. Spicer
L. J. Tassie
B. J. Walby (*ex officio*)

Published in Melbourne for the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science under the editorial control of D. E. Boyd and T. W. Clarke.

Issued six times a year.

Annual subscription \$A30.

Australian Journal of Physics

Contents Volume 32 Numbers 1, 2 March 1979

Papers presented at the joint Australia-U.S.S.R.-U.S.A.
Symposium on Pulsars and Supernova Remnants
held in Sydney, April 1978

- The galactic distribution of pulsars. *R. N. Manchester* 1
- Pulsar microstructure: periodicities, polarization and probes of pulsar magnetospheres. *J. M. Cordes* 9
- Energy spectra and pulse shapes of pulsars at metre wavelengths.
V. A. Izvekova, A. D. Kuzmin, V. M. Molofeev and Yu. P. Shitov 25
- Progress report on the binary pulsar 1913+16. *L. A. Fowler, J. M. Cordes and J. H. Taylor* 35
- Nature of Circinus X-1. *R. F. Haynes, David L. Jauncey, I. Lerche and P. G. Murdin* 43
- Absorption of curvature radiation. *V. V. Zheleznyakov and V. E. Shaposhnikov* 49
- Propagation effects on the polarization of pulsar radio emission.
D. B. Melrose 61
- Laboratory modelling of neutron star magnetospheres. *B. G. Eremin, V. V. Zheleznyakov, A. V. Kostrov, Ya. Z. Slutsker and E. V. Suворov* 71
- Galactic supernova remnants: radio evolution and population characteristics.
J. L. Caswell and I. Lerche 79
- A new catalogue of galactic SNRs corrected for distance from the galactic plane.
D. K. Milne 83
- Secular decreases in the 927 MHz emission from the supernova remnants Cas A and Tau A. *E. N. Vinyajkin and V. A. Razin* 93
- Evolution of the radio emission from young SNRs according to observational data.
K. S. Stankevich 95
- On the structure of the Crab Nebula. *L. I. Matveyenko and V. I. Kostenko* 105
- The supernova remnants IC 443 and VRO 42.05.01: fast filaments and high-velocity gas. *T. A. Lozinskaya* 113
- Optical observations of SNRs in the Magellanic Clouds. *M. A. Dopita* 123

Australian Journal of Physics

Contents Volume 32 Number 3 June 1979

- Calculation of $3jm$ factors and the matrix elements of E_7 group generators.
P. H. Butler, R. W. Haase and B. G. Wybourne 137
- A comparison of effective two-nucleon interactions appropriate for use in analyses of inelastic nucleon scattering. *R. Smith and K. Amos* 155
- Simplified DWBA for heavy ion induced transfer at high energies. *L. R. Dodd* 173
- Partial wave analysis of the $^{18}\text{O}(p, \alpha_0)^{15}\text{N}$ reaction. *L. W. J. Wild and B. M. Spicer* 187
- Gamma-ray studies using a solid argon target: properties of states in ^{40}K and ^{40}Ar .
D. J. Beale, A. R. Poletti and J. R. Southon 195
- Resonance neutron capture in ^{138}Ba and ^{140}Ce and the prompt neutron correction to γ -ray detectors. *A. R. de L. Musgrove, B. J. Allen and R. L. Macklin* 213
- Quantum theory of energy loss by test ions to plasma electrons. *E. P. George, K. Okamoto, Y. Nakamura and T. Hamada* 223
- An investigation of the accuracy of numerical solutions of Boltzmann's equation for electron swarms in gases with large inelastic cross sections. *Ivan D. Reid* 231
- Comparison between the Boltzmann and Monte Carlo simulation methods for the determination of electron swarm transport coefficients in molecular hydrogen.
Ivan D. Reid and Scott R. Hunter 255
- Models of radio recombination line sources. *M. J. Batty* 261
- Short Communications**
- Comment on recent results for ^{40}Ca giant resonances obtained from the $^{40}\text{Ca}(^3\text{He}, ^3\text{He}')^{40}\text{Ca}^* \rightarrow ^{36}\text{Ar} + \alpha$ reaction. *D. Branford* 279
- Widths of the 14.32 and 14.40 MeV levels in ^{16}O . *P. D. Clark, A. Johnston and T. R. Ophel* 283
- Atmospheric gravity wave production for the Australian total solar eclipse of 23 October 1976. *S. M. Ball* 287
- The equilibrium statistical mechanics of a one-dimensional self-gravitational system.
Y. Fukui and T. Morita 289
- Existence and stability of circular orbits in a Schwarzschild field with nonvanishing cosmological constant. *R. J. Howes* 293

Australian Journal of Physics

Contents Volume 32 Number 4 September 1979

- Photon fission in intense laser fields and in the Coulomb field of a nucleus.
J. F. Lindsey, H. S. Perlman and G. J. Troup 295
- Dynamic deformation theory and multiphonon vibrational bands in ^{154}Gd .
K. Kumar, J. B. Gupta and J. H. Hamilton 307
- The $^{12}\text{C}(\text{p}, 2\text{p})^{11}\text{B}$ reaction at 100 MeV. *D. W. Devins, D. L. Friesel, W. P. Jones, A. C. Attard, I. D. Svalbe, V. C. Officer, R. S. Henderson, B. M. Spicer and G. G. Shute* 323
- Cross section measurements in the $^{54}\text{Cr}(\text{p}, \gamma)^{55}\text{Mn}$ reaction. *R. J. Wilkinson, S. R. Kennett, Z. E. Switkowski, D. G. Sargood and F. M. Mann* 335
- Use of nuclear techniques in the characterization of chrome black solar absorber surfaces. *Z. E. Switkowski, J. C. P. Heggie, G. J. Clark and R. J. Petty* 343
- Theoretical analysis of plasmon dispersion in simple metals. *Peter Jewsbury* 361
- Sea level muon spectrum and muon charge ratio derived from CERN results for nucleon-nucleus inelastic interactions. *D. P. Bhattacharyya and R. K. Roychoudhury* 369
- A balloon investigation of galactic γ -ray lines with a high resolution Ge(Li) spectrometer. *M. Yoshimori, H. Watanabe, K. Okudaira, Y. Hirasima and H. Murakami* 375
- Galactic γ -ray lines resulting from interactions between low energy cosmic rays and the interstellar medium. *Masato Yoshimori* 383
- Perturbed characteristic functions: application to the linearized gravitational field.
H. A. Buchdahl 405
- Short Communications**
- 4^- particle-hole states in ^{16}O . *R. S. Henderson, B. M. Spicer, I. D. Svalbe, V. C. Officer, G. G. Shute, D. W. Devins, D. L. Friesel, W. P. Jones and A. C. Attard* 411

Supplementary Series

Abstracts of Astrophysical Supplement Number 46: The Parkes 2700 MHz survey (fourteenth part): Catalogue and new optical identifications. *J. G. Bolton, Ann Savage and Alan E. Wright* 415

Abstract of Astrophysical Supplement Number 47: The HI column density as a function of position in the southern sky. *C. Heiles and M. N. Cleary* 415

Abstract of Astrophysical Supplement Number 48: A catalogue of 5 GHz galactic plane sources. *R. F. Haynes, J. L. Caswell and L. W. J. Simons* 415

Australian Journal of Physics

Contents Volume 32 Number 5 November 1979

- Aspects of the exceptional group E_8 . *B. G. Wybourne* 417
- Bounds for the centre-of-mass-corrected energy-weighted sum rules for nuclear form factors and multipole moments. *W. K. Koo and L. J. Tassie* 427
- An analysis of the γ -ray decay of weak s resonances in ^{40}Ca . *V. A. Knat'ko, B. A. Martsynkevich and E. A. Rudak* 439
- keV neutron capture cross section of ^{170}Yb . *B. J. Allen and D. D. Cohen* 447
- On the functional form of the transition probabilities in the Monte Carlo method as used in statistical mechanics. *C. H. J. Johnson* 455
- Heat capacities and Grüneisen parameters for NaF and NaBr below 25 K. *J. A. Birch, J. G. Collins and G. K. White* 463
- Effects of the wavenumber spectrum of a sea surface on laser beam reflection. *D. M. Phillips* 469
- Mathematical theory of one-dimensional isothermal blast waves in a magnetic field. *I. Lerche* 491
- Kinematic diffusion of scalar quantities in turbulent velocity fields. *I. Lerche* 503
- Optical positions for identifications from the MC2 and MC3 catalogues. *H. S. Murdoch and N. Sanitt* 511
- Short Communications**
- The nucleon ground state. *E. K. Rose, J. L. Cook and E. Clayton* 525
- LEED peak widths: a Fabry-Perot etalon analogue. *Richard Payling, J. A. Ramsey and R. G. Turner* 529

Australian Journal of Physics

Contents Volume 32 Number 6 December 1979

- Meson mass formulae in $SU(5)$. *Ronald Anderson and G. C. Joshi* 533
- Heavy-ion elastic collisions and the nuclear surface diffuseness.
C. B. O. Mohr 541
- keV neutron capture in ^{141}Pr . *R. B. Taylor, B. J. Allen, A. R. de L. Musgrove and R. L. Macklin* 551
- Helium 2^3S densities and excitation mechanisms in a hollow cathode He-Cd⁺ laser. *A. I. McIntosh and J. R. Grace* 561
- Radiation properties of arc antennas in a warm plasma. *K. R. Soni and C. L. Arora* 575
- Low temperature transport properties of the group V semimetals. *J-P. Issi* 585
- Spectroscopy of ionic crystals: the hydrogenated calcium fluoride system.
G. D. Jones 629
- Temperature dependence of carrier scattering rate in copper from magnetoacoustic experiments. *P. B. Johnson and J. A. Rayne* 641
- Nuclear orientation and its application in solid state physics. *B. G. Turrell* 647
- Far infrared absorption by tetrahedrally bonded amorphous semiconductors.
H. J. Trodahl 663
- A model of solar X-ray bright points and ephemeral active regions.
J. H. Piddington 671
- A cylindrical pulsar magnetosphere model with particle inertia. *R. R. Burman and L. Mestel* 681
- Index to Volume 32 695
