RESEARCH PAPERS

- Stocking density and distribution in relation to vegetation in a biodiverse semi-arid pastoral system in South Africa
M. Igshaan Samuels, Nicky Allsopp and M. Timm Hoffman 1–12
- Response of species abundance distribution pattern of alpine meadow community to sampling scales
Minxia Liu, Lei Zhu, Yibo Ma, Yaya Zhang, Lu Xu, Mingxing Wang and Cheng Liu 13–24
- The impact of tree removal on standing grass biomass, seedling establishment and growth of woody species
P. Monegi, N. R. Mkhize, T. J. Tjelele, D. Ward and Z. Tsvuura 25–32
- Responses of grass productivity traits to bush clearing in semi-arid rangelands in North-West Province of South Africa
Mthunzi Mndela, Ignacio C. Madakadze, Julius T. Tjelele, Mziwanda Mangwane, Florence Nherera-Chokuda, Sikhhalazo Dube, Abel Ramoelo and Ngoako L. Letsoalo 33–45
- Understanding the spatiotemporal dynamics of understorey biomass in semi-arid woodlands of south-eastern Australia
Linda Riquelme, Libby Rumpff, David H. Duncan and Peter A. Vesk 47–59
