Johnny Dawson, Gunditjmara, 'Cavalryman and family with a crowd in the background' [Circus audience and performer], ink and watercolour on paper, 25 x 41 cm. SMB,EM VI 2585a. Gifted by Eugene von Guérard. Image courtesy of Staatliche Museen zu Berlin, Ethnologisches Museum. (See page 106.)

Watercolour of Royal Society of Victoria building. Tony Broughton 2009.

## THE ROYAL SOCIETY OF VICTORIA 2023

<i>Patron</i>	THE HON. LINDA DESSAU AC, GOVERNOR OF VICTORIA
<i>President</i>	MR ROB GELL AM
<i>Vice-President</i>	DR CATHERINE DE BURGH-DAY
<i>Honorary Secretary</i>	MR JEFFREY LUCKINS
<i>Honorary Treasurer</i>	MR SIDDHARTH VERMA

The above Office bearers are *ex officio* members of the Council of the Society.

Other members of the Council are:

MR RICHARD BLUNDELL  
DR VIKTOR PERUNICIC  
PROFESSOR DAVID WALKER  
ASSOCIATE PROFESSOR ROBERT DAY  
DR JANE CANESTRA  
DR DJUKEVELDHUIS

<i>Chief Executive Officer</i>	MR MICHAEL FLATTLEY
<i>Honorary Auditor</i>	PITCHER PARTNERS ADVISORS PTY LTD
<i>Trustees</i>	DR ALAN S. FINKEL AC PROFESSOR LYNNE SELWOOD AO PROFESSOR TIMOTHY ENTWISTLE DR GILLIAN SPARKES AM

## EDITORIAL STATEMENT

*Proceedings of the Royal Society of Victoria* is published twice yearly in an online, open-access format through an agreement between the Royal Society of Victoria and CSIRO Publishing. The *Proceedings* is now indexed in Elsevier's Scopus and has a CiteScore, which measures average citations received per document published in the serial. Scopus indexes 22,000 journals. The journal is also being digitised for the Biodiversity Heritage Library.

The Society invites original research articles, reviews and short communications for the *Proceedings*, from authors across the various disciplines of biological, physical and earth sciences, including multidisciplinary research, and on issues concerning technology and the applied sciences. Contributions on topics that are relevant to Victoria and the south-eastern Australian region are particularly encouraged. All contributions are subject to peer review and there are no page or colour charges involved.

### *Manuscript submission change*

From Volume 136 in 2024, the *Proceedings of the Royal Society of Victoria* will be adopting the online journal management system [ScholarOne Manuscripts](#). ScholarOne is the leading system for managing the submission and peer review process for scholarly journals, with over 13 million registered users across the research enterprise, making it familiar to many authors who may potentially submit to the Journal.

We fully realise that a number of our potential authors will either be unfamiliar with ScholarOne or reluctant to use it, preferring the traditional method of submitting manuscripts. Others in the academic world will be quite used to it. Be assured that assistance will be available to help authors manage this change.

The website address for the journal at CSIRO Publishing is <https://www.publish.csiro.au/rs/> and in particular authors should go to the 'Author Instructions' at <https://www.publish.csiro.au/rs/forauthors/AuthorInstructions>. There is a hyperlink in there that takes you to the ScholarOne website to submit a manuscript <https://mc.manuscriptcentral.com/csiro-rs>

If you are a first time user, register via the 'Register here' link, or use your existing username and password to log in. Then click on the 'Author Centre' link and proceed.

# HUMBOLDT SYMPOSIUM PAPERS

## FOREWORD

Alexander von Humboldt has been referred to as ‘the forgotten father of environmentalism’<sup>1</sup>. As early as 1844, he wrote that humans change the climate ‘by cutting down forests, by changing the distribution of water bodies, and through the production of large vapor and gas masses at the centers of industry’<sup>2</sup>. Humboldt also described the greenhouse effect in his *opus magnum*, ‘Kosmos’. And time and again in his writings and in his lectures, he emphasised the interconnectedness of all living creatures on this planet. In times when the effects of climate change become ever more visible and palpable around the globe, it is imperative that the global academic community addresses the topic of sustainability in all its dimensions.

Sustainability is in many ways an integral part of the Alexander von Humboldt Foundation’s work. Our mission is to create sustainable and long-lasting connections between researchers from Germany and the rest of the world. Even in today’s increasingly digitalised world, personal encounters are still an indispensable element in this endeavour because they facilitate mutual trust-building and cooperation. International cooperation built on trust, in turn, is essential for addressing the grand challenges the world is facing — sustainability being perhaps foremost among them.

Against this background, I am glad and grateful that the 19th Biennial Conference of the Australian and New Zealand Associations of von Humboldt Fellows chose the topic of ‘Humboldtian Research towards a Sustainable World’. In a truly Humboldtian spirit, the Conference convened researchers from many different disciplines under one roof, ranging from physics to food science, from chemistry to law and health care. It was a delight to listen to all these excellent contributions.

I was impressed by the extraordinarily welcoming atmosphere at the Conference and the constructive tone in the discussions. It was heartening to see the great team spirit among Humboldtians from Australia, New Zealand and Germany — a Humboldt family that combines a strong internal cohesion on the basis of shared values with a warm-hearted openness towards newcomers. I am deeply grateful for many enriching conversations.

I am convinced that the 19th Biennial Conference of the Australian and New Zealand von Humboldt Fellows made an important contribution towards strengthening the bonds between research communities in Australia, New Zealand and Germany.

Dr Thomas Hesse  
Deputy Secretary, Alexander von Humboldt Foundation
