

THIRTEENTH ANNUAL REPORT OF THE RAOU NEST RECORD SCHEME

INTRODUCTION

The total of 1,651 cards returned for the 1976-77 season is the lowest since 1969-70. It appears that this is because the contributors to the Scheme have decreased. The average return per contributor (30 cards) is equivalent to the previous season (31 cards). This tends to suggest that there was no significant difference in nesting activity between the two seasons.

PARTICIPATION

Between 1 July 1976 and 30 June 1977 the following thirty-one individuals and one corporate body joined the scheme:

E. Atkins (WA)	K. W. Lowe (Vic.)
S. Bennett (Vic.)	I. Lutz (WA)
K. Bottcher (Vic.)	M. S. Miles (Vic.)
R. S. Coghill (Vic.)	K. E. Moroney (WA)
R. V. Cooling (Vic.)	V. Patterson (WA)

In the return of 1,651 cards, seventy-six were submitted for the past two seasons: nine for 1974-75 and sixty-seven for 1975-76. Thus, the totals for previous years have been altered.

Totals for four species were substantially increased: by R. J. and M. N. Brown, who sent in twenty-six cards for the Coot; P. Dann and K. Lowe, thirty-five for the Blackbird; and S. Marchant, thirty-eight for the Yellow-faced Honeyeater and thirty-seven for the Eastern Yellow Robin.

Outstanding contributions came from S. Marchant (Moruya, NSW) who sent in 222 cards, R. J. and M. N. Brown (Manjimup, WA), whose contribution numbered 141 cards, and S. Unthank (Moorooduc, Vic.) who made a substantial return of 116 cards to the scheme.

All contributors are listed below and thanked for their encouragement, interest and hard work during the year. Fifty individuals and four corporate bodies contributed to the scheme and these are listed in Table 1.

RESULTS

The total number of cards in the collection is now 27,882 and the annual totals are as follows:

Pre-1964	898	1971-72	1,914
1964-65	1,602	1972-73	2,098
1965-66	1,640	1973-74	3,608
1966-67	1,786	1974-75	2,576
1967-68	2,405	1975-76	2,098
1968-69	2,407	1976-77	1,651
1969-70	1,598		
1970-71	1,675		27,882

Four hundred and ninety-two species are represented. Cards were received for five species not previously presented: Papuan Frogmouth (R. Elvish); Frilled Monarch (R. Elvish and R. Noske); Bower's Shrike-thrush (A. and T. Lindsey); Red-browed Treecreeper (S. Marchant and R. Noske); Kelp Gull (J. Hobbs).

During the year cards were borrowed as follows:

Bird Observers' Club	Victorian Parrots; species breeding in Victorian Alps.
J. J. Counsilman	Babblers.
Dr X. Dennett	Pied Oystercatcher.
Fisheries and Wildlife Dept., Vic.	Victorian breeding species.
J. Ford	Grey Fantail and Western Gerygone.
Dr H. Frith	Pigeons and doves.
S. Garnett	Dusky Moorhen.
Dr O. Mayo	Plovers
A. Morris	Black-necked Stork.

I should particularly like to thank Helen Young for the efficient and pleasant manner in which she arranged the transfer of the organization of the scheme into my hands. Her diligence made the transition a simple one. I am sure that previous contributors will also join with me in thanking her. I should also like to thank Margaret Considine for helping me with some of the larger tasks involved in running the Nest Record Scheme.
