Functional Plant Biology

Supplementary Material

Overexpression of forage millet (*Setaria italica*) *SiER* genes enhances drought resistance of *Arabidopsis thaliana*

Supplementary Fig. S1. Amino acid sequence alignment of millet SiER family

Different colored backgrounds were used to highlight identical amino acid sequences and similar amino acid sequences, and colored underscores were used to represent different domains: N-terminal signal sequence was red, LRR domain was green, transmembrane domain was black, kinase domain was purple, and C-terminal tail sequence was blue.
