Supplementary Table S1 Reporting guidelines

We followed the reporting guidelines of the Strengthening the Reporting of Observational Studies in Epidemiology (STROBE), the Consolidated Criteria for Reporting Qualitative Research (COREQ), and the Good Reporting of a Mixed Methods Study (GRAMMS) for the anonymous cross-sectional online survey (a), the one-on-one semi-structured in-depth interviews (b), and the explanatory sequential mixed-methods study (c), which are reported below. “Page No.” may be incorrect as it was based on the submitted manuscript.

(a) Strengthening the Reporting of Observational Studies in Epidemiology (STROBE)

| Topic | Item No. | Item description | Reported on page No. and extra information |
|---------------------------|----------|--|---|
| Title and abstract | | | |
| Title and abstract | 1a | Indicate the study’s design with a commonly used term in the title or the abstract | Title and the abstract P2 line 38 |
| | 1b | Provide in the abstract an informative and balanced summary of what was done and what was found | P3, line 54-56 |
| Introduction | | | |
| Background/Rationale | 2 | Explain the scientific background and rationale for the investigation being reported | P3 line 63-66,P4, P5 line 89-99 |
| Objectives | 3 | State specific objectives, including any prespecified hypotheses | P5, line 99-103 |
| Methods | | | |
| Study design | 4 | Present key elements of study design early in the paper | P5, line106-109 |
| Setting | 5 | Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection | P6, line 115-117 |
| Participants | 6a | Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants | P6, line 117-126 |
| | 6b | Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case | N/A |
| Variables | 7 | Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable | N/A |
| Data Sources/Measurement | 8* | For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group | P7, line 142-146 |
| Bias | 9 | Describe any efforts to address potential sources of bias | N/A |
| Study size | 10 | Explain how the study size was arrived at | P6, line 115-116. All midwives from 19 hospitals in Guangdong Province, China participated in the quantitative study. |
| Quantitative variables | 11 | Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why | P8, line 169-171 |
| Statistical methods | 12a | Describe all statistical methods, including those used to control for confounding | P8, line 169-171; P9, line 172-185 |
| | 12b | Describe any methods used to examine subgroups and interactions | N/A |
| | 12c | Explain how missing data were addressed | N/A |
| | 12d | Cohort study—If applicable, explain how loss to follow-up was addressed Case-control study—If applicable, explain how matching of cases and controls was addressed Cross-sectional study—If applicable, describe analytical methods taking account of sampling strategy | N/A |
| | 12e | Describe any sensitivity analyses | N/A |
| Results | | | |
| Participants | 13a* | Report numbers of individuals at each stage of study—eg, numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed | P12, line236-239 |
| | 13b* | Give reasons for non-participation at each stage | N/A |
| | 13c* | Consider use of a flow diagram | A flow diagram was not presented. |

| | | | |
|--------------------------|------|---|--|
| Descriptive data | 14a* | Give characteristics of study participants (eg, demographic, clinical, social) and information on exposures and potential confounders | Table 1, P12, line239-243 |
| | 14b* | Indicate number of participants with missing data for each variable of interest | N/A |
| | 14c* | Cohort study—Summarise follow-up time (eg, average and total amount) | N/A |
| Outcome data | 15* | Cohort study—Report numbers of outcome events or summary measures over time Case-control study—Report numbers in each exposure category, or summary measures of exposure Cross-sectional study—Report numbers of outcome events or summary measures | N/A |
| Main results | 16a | Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included | N/A |
| | 16b | Report category boundaries when continuous variables were categorised | N/A |
| | 16c | If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period | N/A |
| Other analyses | 17 | Report other analyses done—eg, analyses of subgroups and interactions, and sensitivity analyses | N/A |
| Discussion | | | |
| Key results | 18 | Summarise key results with reference to study objectives | P16, line 319-329 |
| Limitations | 19 | Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias | P19, line 394-403 |
| Interpretation | 20 | Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence | P16, line 330-339; P17; P18; P19, line 384-389 |
| Generalisability | 21 | Discuss the generalisability (external validity) of the study results | P20, line 406-410 |
| Other Information | | | |
| Funding | 22 | Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based | P21, line 437-440 |

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

(b) Consolidated Criteria for Reporting Qualitative Research (COREQ)

| Topic | Item No. | Item description | Reported on page No. and extra information |
|--|----------|---|--|
| Domain 1: Research team and reflexivity | | | |
| <i>Personal characteristics</i> | | | |
| Interviewer/facilitator | 1 | Which author/s conducted the interview or focus group? | P8, line 153-155 |
| Credentials | 2 | What were the researcher's credentials? eg, PhD, MD | P11, line 215-220 |
| Occupation | 3 | What was their occupation at the time of the study? | Nurse |
| Gender | 4 | Was the researcher male or female? | Female, P11, line 220 |
| Experience and training | 5 | What experience or training did the researcher have? | P11, line 220-222 |
| <i>Relationship with participants</i> | | | |
| Relationship established | 6 | Was a relationship established prior to study commencement? | The interviewer established a friendly relationship with the participants before interviews. P10, line 196-197 |
| Participant knowledge of the interviewer | 7 | What did the participants know about the researcher? eg, personal goals, reasons for doing the research | The interviewer was not known to the participants before this study. Information about the study and the interviewer was provided before interviews. |
| Interviewer characteristics | 8 | What characteristics were reported about the interviewer/facilitator? eg, bias, assumptions, reasons and interests in the research topic | P11, line 222-225 |
| Domain 2: Study design | | | |
| <i>Theoretical framework</i> | | | |
| Methodological orientation and Theory | 9 | What methodological orientation was stated to underpin the study? eg, grounded theory, discourse analysis, ethnography, phenomenology, content analysis | P9, line 174-185 |
| <i>Participant selection</i> | | | |
| Sampling | 10 | How were participants selected? eg, purposive, convenience, consecutive, snowball | P6, line 122-126 |
| Method of approach | 11 | How were participants approached? eg, face-to-face, telephone, mail, email | P6, line 115-117 |
| Sample size | 12 | How many participants were in the study? | P12, line 235-238 |
| Non-participation | 13 | How many people refused to participate or dropped out? Reasons? | No participants refused to participate or dropped out. |
| <i>Setting</i> | | | |
| Setting of data collection | 14 | Where was the data collected? eg, home, clinic, workplace | P8, line 153 |
| Presence of nonparticipants | 15 | Was anyone else present besides the participants and researchers? | P8, line 154-155 |
| Description of sample | 16 | What are the important characteristics of the sample? eg, demographic data, date | Table 2 |
| <i>Data collection</i> | | | |
| Interview guide | 17 | Were questions, prompts, guides provided by the authors? Was it pilot tested? | P7, line 149-151 |
| Repeat interviews | 18 | Were repeat interviews carried out? If yes, how many? | No repeat interviews were conducted. |
| Audio/visual recording | 19 | Did the research use audio or visual recording to collect the data? | P8, line 155-156 |
| Field notes | 20 | Were field notes made during and/or after the interview or focus group? | P8, line 155. Notes were taken during the interviews. |
| Duration | 21 | What was the duration of the interviews or focus group? | P8, line 156-157 |
| Data saturation | 22 | Was data saturation discussed? | P12, line 236-237 |
| Transcripts returned | 23 | Were transcripts returned to participants for comment and/or correction? | No |
| Domain 3: analysis and findings | | | |
| <i>Data analysis</i> | | | |
| Number of data coders | 24 | How many data coders coded the data? | P10, line 198-200 |
| Description of the coding tree | 25 | Did authors provide a description of the coding tree? | P9, line 177-185 |
| Derivation of themes | 26 | Were themes identified in advance or derived from the data? | Derived from the data |
| Software | 27 | What software, if applicable, was used to manage the data? | P9, line 172-173 |
| Participant checking | 28 | Did participants provide feedback on the findings? | No |
| <i>Reporting</i> | | | |
| Quotations presented | 29 | Were participant quotations presented to illustrate the themes/findings? Was each quotation identified? eg, participant number | Yes, P12-P15 |

| | | | |
|------------------------------|----|--|--------------|
| Data and findings consistent | 30 | Was there consistency between the data presented and the findings? | Yes, P12-P15 |
| Clarity of major themes | 31 | Were major themes clearly presented in the findings? | Yes, P12-P15 |
| Clarity of minor themes | 32 | Is there a description of diverse cases or discussion of minor themes? | Yes, P12-P15 |

Reference: Tong, A., Sainsbury, P., & Craig, J. (2007). Consolidated criteria for reporting qualitative research (COREQ): a 32-item checklist for interviews and focus groups. *International Journal for Quality in Health Care*, 19(6), 349–357. <https://doi.org/10.1093/intqhc/mzm042>

(c) Good Reporting of a Mixed Methods Study (GRAMMS)

| Topic | Item No. | Item description | Reported on page No. and extra information |
|--|----------|--|---|
| Domain 1: Describe the justification for using a mixed methods approach to the research question | | | |
| | 1 | Justification for using a mixed methods approach | P5, line 100-103 |
| Domain 2: Describe the design in terms of the purpose, priority and sequence of methods | | | |
| | 2 | Purpose | P5, line 100-103 |
| | | Priority | The quantitative strand and qualitative strand had equal emphasis. Both strands had equally important role in addressing the research question. |
| | | Sequence | P7 |
| Domain 3: Describe each method in terms of sampling, data collection and analysis | | | |
| Quantitative design | 3 | Sampling | P6, line 115-116. All midwives from 19 hospitals in Guangdong Province, China participated in the quantitative study. |
| | | Data collection | P7, line 142-146 |
| | | Analysis | P8, line 169-171 |
| Qualitative design | | Sampling | P6, line 122-126. The qualitative study was conducted based on the principle of data saturation. |
| | | Data collection | P7, line 148-152; P8, line 153-157 |
| | | Analysis | P9, line 172-185 |
| Domain 4: Describe where integration has occurred, how it has occurred and who has participated in it | | | |
| | 4 | Where integration has occurred | P6, line 115-117; P8, line 153 |
| | | How integration has occurred | P6-P7; P8, line 153-157 |
| | | Who has participated in integration | P8, line 169 |
| Domain 5: Describe any limitation of one method associated with the present of the other method | | | |
| | 5 | Limitation of one method associated with the present of the other method | P19, line 391-403 |
| Domain 6: Describe any insights gained from mixing or integrating methods | | | |
| | 6 | Insights gained from mixing or integrating methods | P16-P19; P20, line 406-410 |

Reference: O’Cathain, A., Murphy, E., & Nicholl, J. (2008). The quality of mixed methods studies in health services research. *Journal of Health Services Research & Policy*, 13(2), 92–98. <https://doi.org/10.1258/jhsrp.2007.007074>

Supplementary Table S2 The training needs and preferences of midwives in providing sexual health education

1. If there were training programs on sexual education during pregnancy, would you be willing to participate?

- A. Very willing
- B. Willing
- C. Uncertain
- D. Unwilling
- E. Very unwilling

2. If there were training programs on sexual education during pregnancy, please rate the following topics based on your perceived need.

| Theme Content | Very Unnecessary | Not Very Necessary | Neutral | Somewhat Necessary | Very Necessary |
|---|------------------|--------------------|---------|--------------------|----------------|
| An introduction to sexual health and sex education | 1 | 2 | 3 | 4 | 5 |
| Basic knowledge of sexual medicine (sexual physiology, sexual psychology, sexual behaviour, and sexual development) | 1 | 2 | 3 | 4 | 5 |
| Comprehensive sexual health counselling and communication skills | 1 | 2 | 3 | 4 | 5 |
| Methods for implementing sexual health education together with assessment of effect | 1 | 2 | 3 | 4 | 5 |
| Female whole-life sexual health care | 1 | 2 | 3 | 4 | 5 |
| Birth control and birth planning – related care issues | 1 | 2 | 3 | 4 | 5 |
| Healthy birth and healthy birth care and infertility-related nursing problems | 1 | 2 | 3 | 4 | 5 |
| Issues related to reproductive tract infections and sexually transmitted diseases | 1 | 2 | 3 | 4 | 5 |
| Sexual psychological disorders, sexual dysfunction and sex-related care problems | 1 | 2 | 3 | 4 | 5 |

| | | | | | |
|--|---|---|---|---|---|
| Issues related to the sexual sociology (sexual culture, sexual morality, sexual attitude, and sexual values) | 1 | 2 | 3 | 4 | 5 |
|--|---|---|---|---|---|

3. Are there any additional topics related to sexual education during pregnancy that you would like to see included? If so, please provide specific details.

4. What type of sexual education training format do you prefer? (Multiple choice)

- A. Attend offline workshops, training sessions, or seminars
- B. Engage in online education
- C. Participate in domestic and international academic conferences and specialized lectures
- D. Self-study
- E. Other (please specify) _____

Supplementary Table S3. Topics addressed in the interviewer guide

| Topic | Guiding Questions |
|---|---|
| <p>Unveiling Professional Development Desires: Exploring the Gaps in Training Needs</p> | <p>I'd like to start by asking if you can provide sexual health information for pregnant women.</p> <ul style="list-style-type: none"> ● Have you received sexual health education? If yes, how did you acquire it? ● Do you think you need to receive more sexual health education? <p>Can you tell me what kind of training you think is most suitable for you?</p> |
| <p>Preferential Pathways: Exploring Distinctive Choices in Training.</p> | <ul style="list-style-type: none"> ● Why do you think so? Could you provide reasons for your opinion? ● Which training method listed in the questionnaire do you think should be emphasized more? Why? ● What do you think needs to be trained about sexual health? ● Were there any other topics you wished to discuss that were not covered in our questionnaire? |
| <p>Reflection</p> | <p>Is there any other information that you wish to share with me?</p> <p>Is there anything that you wish you had known?</p> |
