Table S1. Sampling and incubation time table of different treatments used in the experiment (revised of Chen *et al.* 2016)

Treatments	Wetting cycles	Drying cycles	Sampling intervals
Constant soil moisture (CSM)	The entire period at 130%WHC moisture	0	0-15-30-45-60 days
Mild drying–rewetting (MDR)	2 times (from first to 10 th day and 30 th to 45 th) at 130%WHC moisture	2 times (from 10 th to 20 th day and 45 th to 60 th) at 100%WHC moisture	0-15-30-45-60 days
Sever drying–rewetting (SDR)	2 times (from first to 10 th day and 30 th to 45 th) at 130%WHC moisture	2 times (from 10 th to 20 th day and 45 th to 60 th) at 100%WHC moisture	0-15-30-45-60 days
