Figure S1, S2, S3

Tables S1, S2, S3, S4, S5, S6, S7, S8, S9, S10, S11, S12, S13, S14, S15, S16

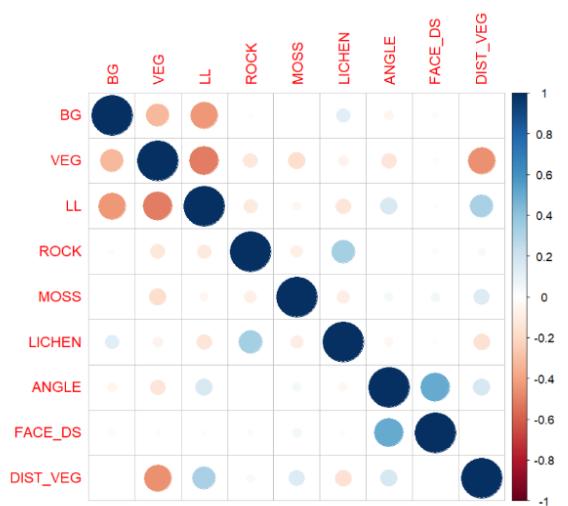

Fig S1. Pearson correlation matrix of microhabitat variables from pooled data (2022 + 2023). No microhabitat variable was found to have a high ($r > 0.80$) correlation value.

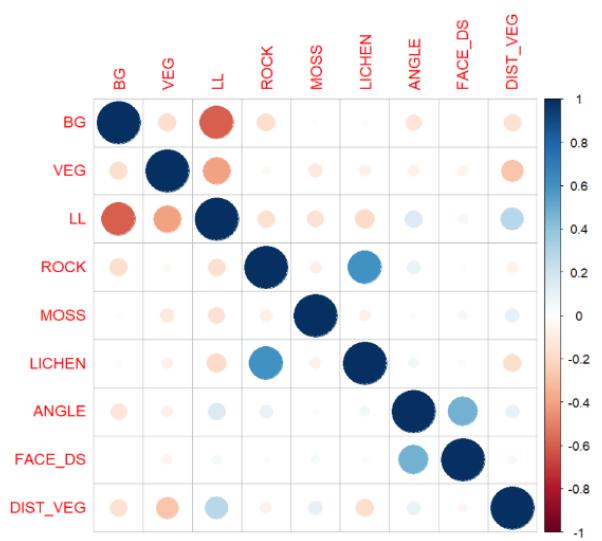

Fig S2. Pearson correlation matrix of microhabitat variables from 2022 data. No microhabitat variable was found to have a high ($r > 0.80$) correlation value.

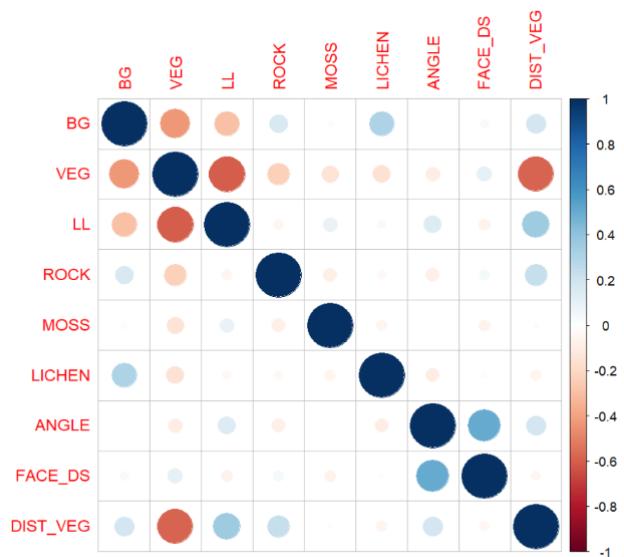

Fig S3. Pearson correlation matrix of microhabitat variables from 2023 data. No microhabitat variable was found to have a high ($r > 0.80$) correlation value.

Table S1. Microhabitat components used to model probability of pygmy bluetongue occupancy of a spider burrow from Kulpara 2022.

* $P = <0.05$; ** denotes ‘best’ model. bg, Bare ground; veg, Vegetation; ll, Leaf litter; rock, Rock; moss, Moss; lichen, Lichen, angle; Angle, face_ds, Face down slope; dist_veg, Distance to nearest vegetation

Model	Predictors	AIC
1	bg, veg, ll*, rock, moss, lichen, angle, face_ds, dist_veg*	-65.05
2	bg, veg, ll*, rock, moss, lichen, angle, dist_veg*	-66.95
3	bg, veg, ll*, rock, moss, lichen, dist_veg*	-67.86 **

Table S2. Metrics from the ‘best’ model (AIC = -67.86; Table S1) based on occupancy of a spider burrow by a pygmy bluetongue from Kulpara 2022 data.

s.e., standard error; t , t value; P , p value

Microhabitat variable	Estimate	s.e.	t	P
Intercept	2.339	0.696	3.361	<0.01
Bare ground	-0.137	0.091	-1.490	0.144
Vegetation	-0.184	0.105	-1.758	0.086
Leaf litter	-0.262	0.114	-2.298	0.027
Rock	-0.214	0.120	-1.780	0.083
Moss	-0.210	0.141	-1.489	0.144
Lichen	-0.193	0.119	-1.622	0.113
Distance to nearest vegetation	-0.002	0.0007	-2.275	0.028

Table S3. Microhabitat components used to model probability of pygmy bluetongue occupancy of a spider burrow from Kulpara 2023.

* $P = <0.05$; ** denotes ‘best’ model. bg, Bare ground; veg, Vegetation; ll, Leaf litter; rock, Rock; moss, Moss; lichen, Lichen, angle; Angle, face_ds, Face down slope; dist_veg, Distance to nearest vegetation

Model	Predictors	AIC
1	bg, veg, ll, rock, moss, lichen, angle*, face_ds, dist_veg	-65.73
2	bg, ll, rock, moss, lichen, angle*, face_ds, dist_veg	-67.65
